Setting up your Nimbus Bridge

Your Meural Canvas, running on Nimbus. It takes about ten minutes.

Before you start

- **Your Meural is on and connected to your home Wi-Fi.** If it isn't yet, use Meural's own app to put it on Wi-Fi first.
- **Your phone has Bluetooth turned on.** On Android, also allow the Nimbus app to use your location when it asks.
- **Your Nimbus sign-in:** the email and password you used when you ordered.
- **Power:** use the power supply in the box. No power supply in the box? You need a **micro-USB** power supply rated **5V and at least 2.5A** (the rating is printed on its label). Most ordinary phone chargers aren't strong enough and can make the bridge restart or drop off Wi-Fi. Need one? Just email us.

Set it up

1. **Get the Nimbus app** for iPhone or Android. Scan the code, or go to nimbusframe.net/appStoreRedirect.aspx
2. **Plug in the bridge** anywhere in range of your home Wi-Fi, and give it a minute to start up.
3. **Open the app and sign in.** On the Frames screen, tap **+**, then **Set Up New Bridge**.
4. **Follow the steps.** The app finds your bridge over Bluetooth, connects it to your home Wi-Fi, and adds it to your account. Choose the **same Wi-Fi network your Meural uses**.
   A code may flash on the screen for a moment. You can ignore it; there's nothing to type.
5. **Pair your Meural.** The app goes straight on to find your Meural. Give it a name and pick a playlist, and your art appears.
   Meural switched off? Skip that step and come back later: More, then Manage Bridges.

Scan to get the Nimbus app

Good to know

- **Bring your Meural galleries over** (optional): sign in at nimbusframe.net/MeuralImport.aspx and they become Nimbus playlists.
- **Dark screen at night?** That's normal. Frames sleep at night on a schedule you can change in the app.
- **Something stuck?** Give it a few minutes. It's almost never your hardware, and we're happy to help.

Questions? We're real people and glad to help.
