Setting up your Nimbus Orion

Your new art frame. Hang it, plug it in, and connect it from the Nimbus app.

Before you start

- **Your home Wi-Fi name and password.** If your router has both 2.4 GHz and 5 GHz networks, choose the 2.4 GHz one.
- **Your phone has Bluetooth turned on.** On Android, also allow the Nimbus app to use your location when it asks.
- **Your Nimbus sign-in:** the email and password you used when you ordered.
- **In the box:** your Orion, its flat white power cord, the wall anchor set, and this sheet.
- **Careful:** don't lift the frame by its top edge. Hold it by the sides.

Set it up

Gave us your Wi-Fi details when you ordered? We set your frame up before it shipped, so it connects on its own. Just do steps 2 and 3 and skip the rest.

1. **Get the Nimbus app** for iPhone or Android. Scan the code, or go to nimbusframe.net/appStoreRedirect.aspx
2. **Mount the hanger** level on the wall, near an outlet and within reach of your Wi-Fi, with at least one screw in a stud. The hanger's holes sit about 2" below the top of the frame. The back of the frame has hangers for landscape or portrait, plus a standard VESA mount.
3. **Plug in the power cord and turn on the On/Off switch** on the back, then hang the frame and peel off the protective film. Within a minute or two the Nimbus setup screen appears.
4. **Open the app and sign in.** On the Frames screen, tap **+**, then **Set Up New Frame**.
5. **Follow the steps.** Keep your phone within a few feet of the frame. The app finds it over Bluetooth, connects it to your home Wi-Fi, and adds it to your account. There's no code to type.
   The frame shows "Loading your playlist" for a moment, then your art appears.

Scan to get the Nimbus app

Good to know

- **Choose what it shows** in the app or at nimbusframe.net: art from the Nimbus collections, or your own photos.
- **Dark screen at night?** That's normal. Frames sleep at night on a schedule you can change in the app.
- **Frame doesn't show up in the app?** Move your phone closer and check that Bluetooth (and on Android, location) is on for the Nimbus app.
- **Something stuck?** Give it a few minutes. If it's still stuck, email us and we'll help.

Questions? We're real people and glad to help.
